📋 Edulateral Foundation — Official Operational & Legal Compliance Dossier

GLA University Block Teaching: High Performance Computing (Intel & NEC Edition)

Program Dates: Monday, November 16th, 2026 – Friday, November 20th, 2026 (5 Full Days)
Location: GLA University Campus, Mathura, Uttar Pradesh, India
Client / University Partner: GLA University (Department of Computer Science & Engineering)
Training Partner: Edulateral Foundation (in technical alignment with Intel & NEC Supercomputing)
Lead Trainer: Shivam Gupta (~Shivam SEED)
Co-Trainer / Counterpart: Mr. Nikhil / Designated Co-Trainer
Key Edulateral Stakeholders:

- Pedina Sreeja, Program Operations Executive, Edulateral Foundation (Mob: +91 9861773390 | Email: sreeja@edulateral.com)
- Dilip Kumar, Senior Management, Edulateral Foundation (Email: dilip@edulateral.com)
- Rajat Garg, Academic & Operations Coordinator (Email: rajatgarg.iitr@gmail.com)

🏛 Executive Summary & Mandate Overview

This dossier establishes the comprehensive operational, legal, financial, and pedagogical framework governing the 5-day High Performance Computing (HPC) Block Teaching program at GLA University. As communicated formally by Edulateral Foundation operations, this program represents an intensive, high-stakes institutional deployment. Strict compliance with all operational directives, intellectual property safeguards, presentation standards, and technical delivery protocols is mandatory.

EDULATERAL FOUNDATION OPERATIONAL CHARTER		
LEGAL & IP MANDATE	FINANCIAL TERMS	OPERATIONAL EXCELLENCE
• Exclusive Edulateral IP ownership	• Gross: ₹18,000 INR	• 100% Offline Pen Drive
• Zero Social Media / Personal Media Posts	• 50% Day 1 Advance	• Zero External Sites
• Legal action warning	• 50% Post-15 Days	• Edulateral Logo Banner
	• 10% TDS (Sec 194J)	• 125 Evaluative MCQs
	• Net: ₹16,200 INR	• Dual-Trainer Redundancy

💰 Section 1: Financial Structure, Invoicing & Tax Compliance

1.1 Remuneration Terms

- **Total Gross Honorarium**: ₹18,000 INR (Eighteen Thousand Indian Rupees) for the full 5-day Block Teaching commitment.
- **Milestone Disbursement Schedule**:

1. **Milestone 1 (Advance Disbursement)**:
   - **Percentage**: 50% of total honorarium (₹9,000 INR gross).
   - **Disbursement Trigger**: Day 1 of Block Teaching (Monday, November 16th, 2026), upon successful commencement of morning session.
   - **Net Payout after 10% TDS**: ₹8,100 INR.
2. **Milestone 2 (Final Settlement)**:
   - **Percentage**: Remaining 50% of total honorarium (₹9,000 INR gross).
   - **Disbursement Trigger**: Due within 15 working days following the successful conclusion of the 5-day training (by Monday, December 14th, 2026).
   - **Net Payout after 10% TDS**: ₹8,100 INR.
3. **Total Net Realized Payout**: ₹16,200 INR.

1.2 Taxation & TDS Compliance (Section 194J)

- **TDS Deduction**: As mandated by the Income Tax Act of India, a **10% Tax Deducted at Source (TDS)** under Section 194J (Fees for Professional or Technical Services) will be deducted against the trainer's Permanent Account Number (PAN).
- **Mandatory PAN Verification**:
  - The trainer must ensure their valid PAN card copy and bank account details (Bank Name, Account Number, IFSC Code, Account Holder Name matching PAN) are submitted to Pedina Sreeja (`sreeja@edulateral.com`) prior to Day 1.
  - Failure to furnish a valid PAN prior to billing triggers statutory deduction under **Section 206AA at the higher rate of 20%** (reducing payout by an additional ₹1,800 INR). Immediate pre-event submission prevents this deduction.
- **Form 16A Issuance**: Edulateral Foundation accounts will issue Form 16A reflecting the ₹1,800 INR tax credit within the quarterly filing cycle (Q3 FY 2026-27), credited directly to the trainer's AIS (Annual Information Statement) / 26AS.

⚖️ Section 2: Intellectual Property, Non-Disclosure & Media Protocol

2.1 Intellectual Property Ownership (Clause 3)

- **Exclusive Ownership**: The entire HPC curriculum, training syllabi, presentation slide decks, laboratory source code, challenge rubrics, evaluation MCQs, and all multimedia assets (photographs, audio recordings, video captures) created or utilized during the Block Teaching constitute the exclusive **Intellectual Property (IP) of Edulateral Foundation**.
- **Strict Prohibition of Unauthorized Use**:
  - Trainers are strictly prohibited from utilizing event media, slide decks, or curriculum materials for personal commercial gain, third-party workshops, or public distribution.
  - **Social Media Embargo**: Under no circumstances may photos, videos, student classroom snapshots, selfie captures, campus video reels, or training materials be posted on personal social media platforms (LinkedIn, Instagram, YouTube, X/Twitter, Facebook, GitHub public repos) without explicit written authorization from Edulateral Foundation management.
  - **Legal Enforcement**: Any unauthorized publication, commercial reuse, or social media leak constitutes copyright infringement and contractual breach, actionable under Indian Copyright Act (1957) and commercial tort law.

2.2 Branding & Presentation Standards (Clause 3 & Clause 5)

- **Mandatory Edulateral Logo Banner**:

- Every document, slide deck, handout, cheat sheet, code header, and evaluation sheet presented to students or projected in the lecture hall must prominently display the **Edulateral Foundation Logo** and official copyright banner.
- Presentation slide decks must be provided in standard 16:9 widescreen format adhering to the official Edulateral corporate aesthetic (Navy/Slate palette, high contrast, clean typography).

- **Pre-Delivery PPT Submission (Clause 5)**:
  - All 5 daily PowerPoint presentation slide decks (`.pptx`) must be compiled, reviewed, branded, and delivered to Edulateral Foundation operations (`sreeja@edulateral.com` and `dilip@edulateral.com`) **prior to the commencement of Day 1**.

👔 Section 3: Professional Conduct, Demeanor & Institutional Logistics

3.1 Professional Attire & Representation (Clauses 1 & 2)

- **Corporate Persona**: The trainer represents Edulateral Foundation at GLA University. The university administration, faculty coordinators, and senior B.Tech students form lasting impressions of Edulateral's institutional caliber based on the trainer's demeanor.
- **Dress Code**:
  - Professional corporate attire: Collared formal dress shirt, tailored formal trousers, formal leather shoes, and a blazer/jacket.
  - Well-groomed grooming standards: Maintain an authoritative, polished, corporate executive presence at all times.
- **Punctuality & Arrival**:
  - Arrive on the GLA University campus at least 45 minutes prior to the scheduled start time on Day 1 to coordinate lab room allocation, projector HDMI/VGA connections, network access, and seating arrangements.
  - Daily arrival: Minimum 30 minutes prior to session commencement.

3.2 Hospitality & Campus Logistics

- **Food & Refreshments (Clause 1)**:
  - Breakfast and Lunch are provided by GLA University at the institutional guest house or executive faculty dining hall.
  - Coordinate with the GLA University departmental liaison upon morning arrival for dining hall coupons or faculty lounge escort.

3.3 Classroom Timing & Institutional Rhythm

- **Standard Institutional Block Schedule (9:00 AM – 5:00 PM)**:
  - The block training is structured into four intensive 90-minute pedagogical blocks per day:
    - **Block 1 (09:00 AM – 10:30 AM)**: Foundational Concept & Hardware Microarchitecture Lecture.
    - *Tea Break (10:30 AM – 10:45 AM)*
    - **Block 2 (10:45 AM – 12:45 PM)**: System Command Line, Whiteboard Architecture & Live Benchmark Showdown.
    - *Lunch Break (12:45 PM – 01:45 PM)*: Institutional Dining Hall.
    - **Block 3 (01:45 PM – 03:15 PM)**: Hands-On Student Laboratory Challenges (Individual Coding).
    - *Short Break (03:15 PM – 03:30 PM)*
    - **Block 4 (03:30 PM – 05:00 PM)**: Enterprise Scale-Up, Slurm/oneAPI Execution, Daily MCQ Evaluation & Placement Alignment.

🛡️ Section 4: Pedagogical Safeguards & Anti-Competitor Directive

4.1 Strict Prohibition of External Competitor Websites (Clause 6)

- **The Mandate**: "*No external support, such as ChatGPT or GeeksforGeeks, should be used during the Block Teaching or even promote other websites that are Edulateral competitors.*"
- **Strategic Rationale**:
  - Opening ChatGPT or LLM query windows on the projector projects amateurism, destroys student perception of trainer authority, and signals lack of domain mastery.
  - Referencing GeeksforGeeks, Javatpoint, or competitor blogs gives free brand exposure to platforms that compete directly with Edulateral's corporate upskilling business.
- **Enforcement Strategy**:
  - **Complete Whiteboard Autonomy**: The lead trainer must be capable of deriving every architectural equation (Amdahl's law, Ring-AllReduce communication volume, Amortized KV-cache memory requirements) live on the physical whiteboard from first principles.
  - **Offline Man Pages & Self-Contained Cheat Sheets**: Distribute self-contained Edulateral Quick Reference Cards containing all bash, Slurm, OpenMP pragmas, and MPI signatures directly to students.
  - **Zero Browser Dependencies**: All live demonstrations must execute directly inside local Linux terminals and standalone Python/C++ scripts without internet reliance.

4.2 Dual-Trainer Redundancy & Counterpart Readiness (Clause 4)

- **The Mandate**: "*Make sure everyone knows all sessions of the Block Teaching to be handled, in the absence of your counterpart be ready to deliver.*"
- **Role Division**:
  - **Lead Trainer (Shivam Gupta)**:
    - Primary podium instructor. Drives the master slides, terminal demonstrations, architectural lectures, and placement interview discussions.
  - **Co-Trainer / Floor Support (Nikhil / Counterpart)**:
    - Active floor patrol during lab challenges. Resolves local PC syntax errors, missing library paths, and SSH timeouts within 30 seconds to maintain uninterrupted lecture momentum.
  - **Fail-Safe Protocol**:
    - If either trainer is delayed or incapacitated, the counterpart must be 100% prepared to deliver the entire day's session solo with zero drop in technical rigor or pacing. Both trainers possess identical copies of all slides, scripts, solutions, and MCQ evaluation keys.

💾 Section 5: The Offline Pen Drive Software Dump Kit (Clause 3)

5.1 The Pen Drive Directive

- **The Mandate**: "*Have dumps of all softwares required in pen drive and everybody has the presentation and necessary documents handy.*"
- **Operational Vulnerability Addressed**:
  - University computer labs frequently experience network throttling, aggressive proxy firewalls, blocked PyPI/Conda ports, or complete internet outages.

- If 60 students simultaneously attempt `pip install tensorflow` or `git clone` during a lab, the lab network collapses, bringing the training to a catastrophic standstill.

- **The Solution**:
  - Pre-configure a master bootable/high-speed USB 3.2 pen drive (and distribute copies across lab PCs) containing:
    1. Complete offline Python wheel repository (`wheels/`) covering NumPy, Pandas, Scikit-learn, `scikit-learn-intelex` , TensorFlow-MKL, OpenVINO, `optimum-intel` , Horovod, and mpi4py.
    2. Miniconda3 standalone Linux x86_64 installer script.
    3. Standalone Intel oneAPI Base Toolkit and HPC Toolkit offline installers (`l_BaseKit_*_offline.sh` , `l_HPCKit_*_offline.sh`).
    4. Slurm simulator scripts and standalone OpenMPI tarballs.
    5. Synthetic offline CSV and NPZ benchmark datasets (100,000 to 5,000,000 rows).
    6. All 5 Edulateral branded PowerPoint presentation decks (`.pptx`) and PDF equivalents.
    7. Fully automated 1-click lab setup bash script `setup_offline_lab.sh` .

📝 Section 6: Official Daily Evaluative Assessment Strategy (Clause 7)

6.1 Assessment Mandate

- **The Mandate**: "*MCQ to be provided as per the request by the Edulateral coordinator.*"
- **Implementation Plan**:
  - Edulateral coordinator requires rigorous, objective assessment metrics to validate student learning outcomes and report progress to GLA University department heads.
  - A comprehensive bank of **125 High-Performance Computing Evaluative MCQs** has been authored (25 questions per day).
  - Every MCQ adheres to academic rigor:
    - Real-world scenario-based questions.
    - 4 distinct, plausible engineering distractors.
    - Clear single correct answer.
    - Forensic technical explanation detailing the silicon architecture, compiler flag, or runtime algorithm.
  - Delivery modes supported:
    - Printable paper evaluation sheets with Edulateral header.
    - Digital Google Forms / LMS export via automated JSON extractor.
    - End-of-day 15-minute quick-fire classroom quiz for immediate student retention reinforcement.

🗓️ Section 7: Comprehensive 5-Day Master Timetable (GLA University Block Teaching)

Day & Date	Morning Block 1 (09:00 - 10:30)	Morning Block 2 (10:45 - 12:45)	Afternoon Block 3 (01:45 - 03:15)	Afternoon Block 4 (03:30 - 05:00)
Day 1: Mon, Nov 16	HPC Paradigms, Moore's Law Limits, Amdahl's Law, Intel Xeon & NEC Vector Engine Silicon	Linux HPC CLI, Bash Automation (`set -euo pipefail`), Passwordless Ed25519 SSH	Hands-On Lab: CPU topology profiling (`lscpu -C`, NUMA nodes, AVX-512 flags)	oneAPI Base & HPC Toolkit setup, Day 1 MCQ Quiz (25 Qs), Placement Alignment
Day 2: Tue, Nov 17	Shared vs Distributed Memory, Flynn's Taxonomy, OpenMP Pragmas & Thread Pinning	MPI Communicators, Collective Ops, Intel oneDAL Architecture & Math	Hands-On Lab: OpenMP Matrix Multiply, MPI Ring Pipeline, `sklearnex` 30x Speedup	Race condition debugging, False sharing diagnosis, Day 2 MCQ Quiz (25 Qs)
Day 3: Wed, Nov 18	Deep Learning on Silicon, GEMM Math, oneDNN Primitives, Intel AMX / Habana Gaudi	Slurm Cluster Architecture, `#SBATCH` scripts, Horovod Ring-AllReduce Math	Hands-On Lab: TensorFlow-MKL training, Slurm job queue dispatch, multi-GPU Horovod	Node resource allocation, checkpointing rank 0, Day 3 MCQ Quiz (25 Qs)
Day 4: Thu, Nov 19	Distributed AI Scaling Efficiency, InfiniBand RDMA, Multi-Node Slurm Workflows	Intel VTune Profiler Architecture, PMU Counters, Top-Down Analysis (TMAM)	Hands-On Lab: Bottleneck injection, VTune Hotspots & Memory Access profiling	Code optimization showdown, Memory bandwidth bounds, Day 4 MCQ Quiz (25 Qs)
Day 5: Fri, Nov 20	Generative AI & LLM Systems, Prefill vs Decode Phases, Memory Wall Bottlenecks	Intel Hardware for LLMs (Xeon AMX, Gaudi 2/3), OpenVINO Runtime & INT4 NNCF	Hands-On Lab: OpenVINO LLM benchmark, FastAPI inference server deployment	Distributed LoRA / PEFT fine-tuning, Capstone project blueprint, Day 5 MCQ Final Exam

✅ Section 8: Final Pre-Deployment Checklist for Shivam Gupta

- [x] Review and acknowledge operational terms forwarded by Rajat Garg from Pedina Sreeja.
- [ ] Submit valid PAN card copy and bank account details to `sreeja@edulateral.com` (Avoid 20% TDS).
- [ ] Confirm travel, train/cab schedule to GLA University, Mathura for Sunday, November 15th arrival.
- [ ] Inspect corporate formal attire (blazers, shirts, trousers, formal shoes).
- [ ] Ensure master high-speed USB 3.2 pen drive is pre-loaded with `OFFLINE_PENDRIVE_TOOLKIT/`.
- [ ] Verify all 5 PowerPoint slide decks (`.pptx`) are generated and emailed to Edulateral Foundation.
- [ ] Verify all 125 MCQs are formatted and ready for coordinator request.
- [ ] Coordinate with co-trainer (Nikhil) on aisle-patrol and live coding redundancy protocols.
- [ ] Maintain 100% offline autonomy: zero browser dependence on ChatGPT, GeeksforGeeks, or external portals.
